BeyArt is an art platform founded in 2022 aiming to connect talented artists and art enthusiasts through curated exhibitions and cultural collaborations, fostering a dynamic artistic community in Lebanon and beyond.

TERRAE LIBANI — Latin for “The Land of Lebanon” — is a collective exhibition curated by Ranine El Homsy celebrating the diversity, depth, and resilience of the Lebanese territory through contemporary art. We have invited artists to interpret Lebanon’s landscapes, cityscapes, flora, fauna, and human spirit — whether through documentary realism, abstraction, nostalgia, critique, or dreamlike imagination. This exhibition aims to reflect the full spectrum of Lebanon — its beauty, contradictions, vitality, and tension — through newly created, never-before-exhibited works.

The program is particularly active during Beirut Art Days (July 9–12). It includes: talks, workshops, a guided tour, community encounters and discussions.

These events will deepen engagement with the public and offer multiple entry points into the themes of the show.
